Built to Entertain

Synology DS415play is a ready media server specifically designed for users who have a huge multimedia library and are eager to share them. With up to four drive bays, DS415play allows for flexible RAID configurations to achieve efficient data redundancy. DS415play comes with dual core CPU and 1GB RAM, delivering an average 112.45 MB/sec reading and 101.21 MB/sec writing speed under RAID 5 configuration in a Windows® environment.¹ Powered by **hardware accelerated transcoding engine**, DS415play features 1080p Full HD video transcoding on the fly, effortlessly sharing videos with your smart TV, network media player, mobile devices and PC. DS415play comes with the external interfaces you need - up to three USB 2.0 ports to power multiple peripheral devices concurrently, and another two **USB 3.0** ports for high speed external storage exchange. Designed with both safety and convenience in mind, DS415play contains hot-swappable **tool-less hard drive trays** to enable hassle-free hard drive installation and risk-free hard drive replacement.

Full Multimedia Features

With DS415play you can easily manage your multimedia contents and share them with smart TV, Android TV box, network media player, tablets and phones, Windows PC, Mac®, and Linux® computers. **Photo Station**'s intuitive design allows you to effortlessly organize photos into customized categories, smart albums and blog posts, and link them to social networking websites like Facebook, Twitter, Plurk, Picasa, Weibo and QQ within a few clicks. **Audio Station** comes with a built-in lyrics plugin, Internet radio, and support for DLNA, AirPlay®, and Bluetooth speakers for quality playback. With **Video Station**, movies and seasons of TV shows are automatically indexed with online metadata. You can also record your favorite programs with DTV tuners (currently supporting DVB-T, DVB-S and DTMB standards).

DLNA®-Certified Media Server

A certified **DLNA DMS** (Digital Media Server), DS415play serves also as a ready media server with the capability to host digital multimedia contents for remote playback. DLNA-compliant devices can access the shared contents in DS415play in the same local area network without the fuss over privilege settings. Not only does it make your multimedia bank available without any preconfiguration, Synology mobile apps transform your mobile device into the remote control of your DS415play, sending movies and photos to your TV or music to your speaker right from the palm of your hand.

Wireless Multimedia Streaming

DS415play turns your living room into a multimedia entertainment center.

Synology QuickConnect and Mobile Apps

For users whose network environment is lacking a public IP address or the ability to configure port-forwarding, **QuickConnect** provides a relay service for you to access your Synology NAS from anywhere around the globe, even when it's hidden in a local area network. With a customizable QuickConnect ID, you can log in to Synology NAS from DSM browser interface, Synology desktop utilities, and mobile apps.

Synology provides mobile applications that let you enjoy the full variety of your multimedia library even when you're on the go, allowing you to reach for your private albums, music and video collection at home in DS415play. Available on iOS, Android™ and Windows Phone platforms, **DS photo+**, **DS audio**, and **DS video** mobilize your Photo Station, Audio Station and Video Station, potentially placing terabytes of content at your fingertips. On top of that, **DS download** makes it possible for you to manage and monitor your download tasks remotely and **DS file** allows you to access the files in DS415play whenever required.

Easy Setup and Management

Combined with a quick start widget, users can simultaneously tour the DSM operating system and set it up to use right away. For users unfamiliar with complicated router configurations or those who simply want to save time, the Synology **EZ-Internet Wizard** simplifies the process of setting up access to the Synology DS415play from the Internet. EZ-Internet Wizard walks you through all of network settings including firewall, port-forwarding, PPPoE setup and DDNS registration. The **multi-tasking web UI** on DSM allows users to run multiple applications simultaneously on one tab browser and switch between them instantly. **Synology Hybrid RAID** allows you to reach maximum use of your hard drive while keeping your storage safe with data redundancy.

Running on Synology DiskStation Manager (DSM)

Synology DiskStation Manager (DSM) is a web-based OS that provides private cloud service. It is designed to make your everyday living easier.

The built-in **Package Center** allows you to download and install the packages designed specifically for your unique needs. All will happen with just a few clicks.

The simple interface allows you to obtain and configure storage capacity with minimal friction. It provides you with complete control of your personal cloud and lets you access it anywhere. Synology DSM will help you maximize productivity and get more out of your digital assets with minimal fuss.

Energy Efficient with Cool and Quiet Design

Synology DS415play is designed with energy efficiency in mind. Not only does it provide two 92 X 92 mm fans and smart airflow to keep the system running cool 24/7, its noise dampening design makes it really quiet compared to PC counterparts. The hard drive hibernation can further reduce power consumption and operation cost.

All Synology products are produced with RoHS compliant parts and packed with recyclable packing materials. Synology acknowledges the responsibility as a global citizen to continually work to reduce the environmental impact of every product produced.
